

Gotham Expects Soon to Call Londoners Over the Telephone

"Hello, New York! This is Paris talking. How are you?"

Thus businesslike Gotham will soon be saluted by fashionable Paris, if the plans of Julien Bethond, a French inventor, are carried to completion. According to the inventor he has succeeded in perfecting a system of wireless telephony which, if the claims for it are justified, will revolutionize all present methods of long distance communication. A man in Paris will be able to talk with a man in New York with the same ease as if both were in one city. Bethond claims that by his system of sparkless wireless two hundred words a minute may be transmitted across the ocean.

What will this mean to the business and social world? No longer will it be necessary to resort to the cable with its tedious waits. Just step to the telephone, call "central" and ask for the "international operator." In almost the time it takes to tell you you will be talking with a friend 3,000 miles away.

You are interested in stocks, aren't you? Of cutting the coupons has driven you to seek rest or rather relaxation in Paris. One morning while reading your favorite French paper at the breakfast table you discover that "copper" is making valiant attempts to blow the top of the financial bonanza.

"Why not get a bit of the fleece that is being clipped?" you muse. "But if I cable to my broker for a little inside information and then have to wait his reply the exchange will be closed before I can get in on this good thing. But, ah! There is the telephone—blessings on M. Bethond."

Central Asks "Country Please"

You step to the phone, and after the usual difficulties get the "international" wire—or other rather.

"Give me New York," you reply to her query. "Country, please?"

A wait of three minutes, and so clearly does the sound of a voice come through the receiver that, despite your belief that nothing is impossible in this day of wonderful inventions, you are startled to think that the "hello" you hear comes from someone in New York—about 3,000 miles away and only the air to carry the words! But wait a bit.

"Hello, New York," you reply. "I want Central 45."

"Wrong town," comes back in dulcet tones. "This is Rio de Jan—"

"O, go to Timbuctoo," you shout in rage.

"Ask for 'information,' please"—and the tones are as sweet as those of any "wire" operator in Cairo, El Timbuctoo isn't on this exchange."

Eventually you get New York and a few minutes later you are in direct communication with your broker, and if you are lucky, for even the wire telephone can't make a "safe thing" of the stock market, you have placed an order that will mean you can prolong your visit in gay Paris.

It has long been a characteristic saying of the American business man that "he never writes—he telegraphs."

Now this can be changed to a more modern form—"he never cables—he wireless phones." Such is evolution!

Paris Will Be New York Suburb

With the new wireless it will be possible for a business man to spend the greater portion of his time abroad and still keep in personal touch with affairs at home. Every day, or as often as he desires, he can call up his office and give his orders and get full reports just as if he were at home.

But the business side of the wireless phone is small compared to the social revolution it promises to work.

Paris will be but a suburb of New York. Gossip will be exchanged through the ether by Mme. Corot and Mrs. Jones-Smith with perfect ease and the same disregard of facts as it is now exchanged by Mrs. Jones-Smith and Mrs. Smith-Jones across the courtyard of their apartment building and through everyday New York air.

Can't you imagine some such conversation as this when the new Bethond system is installed:

"Is that you talking, Marie?"

"Yes, Amanda. I called you up to tell you about those Dubois who live next door to us. You remember Annette? Well, she has eloped with that—"

"I can't understand a word you are saying Marie. This phone is adjusted only to 200 words a minute, you know. I can hardly wait to hear the details, but you simply must speak slower."

And when the elopement of Annette has been disposed of what more natural than Marie should inform Amanda that the newest creation of Poirat has an extra gown to its skirt and that the puffers aren't nearly so voluminous this week as they were last.

Then too, what a relief it will be to mildly traveling abroad. It will be so easy to call up "John" and explain why it is imperative to have some additional funds at once. A cablegram is so unsatisfactory, as there simply isn't enough space to allow for ample

explanations. But with the telephone, why, it will be almost as easy to wheedle money out of "dear John" as if you were talking to him face to face. Besides, he will probably "come across" at once in preference to paying a large phone bill—due, of course, to his trying to answer your arguments.

May Hasten the Millennium

With New York and Paris connected by wireless phone it will be almost as if the latter city were a suburb of the former. Friendships formed by tourists will be kept up instead of being allowed to languish as they are in this present time of picture postcard correspondence.

Is it too much to suppose that if the wireless telephone comes into universal use that its effect will be to abolish war? For how could any man having had almost daily conversation with another, albeit they are in widely separated countries, go to war against him? Disciples of universal peace have long been advocating the sending of school children from one country into another as a proper means of inculcating a spirit of brotherly love. The idea being that in future generations war would be made almost impossible as a result.

This long hoped-for result will not now have to be deferred, thanks M. Bethond. He points out that his method of telephony if put into general use will bring men into such close relationship that the very thought of war—for it would virtually be a war between friends—will be abhorrent.

"My telephone will revolutionize the world, I think," said the inventor recently. "Not only the world of business, but of society as well. There will be a constant interchange of ideas that has hitherto been impossible and the results are wonderful to contemplate. Why, I even believe it will come that my invention will bring all the civilized people of the world in such close relationship, a universal language will be a necessity. It might mean the hastening of the millennium—who knows?"

UNIVERSITY EXHIBIT COMES TO COCHISE

Trainload of Agricultural Products Will Now Tour the Southern Counties

Another demonstration train under the auspices of the University of Arizona will leave Phoenix on December 2 for the southern trip. One train has just completed a trip through the northern sections of the state. The promotion of scientific agriculture is the purpose of these trains, says The Star.

The train will start from Phoenix and take in the following towns on its trip: Buckeye, Tempe, Mesa, Maricopa, Yuma, Casa Grande, Tucson, Cochise, Wilcox, Bowie, Pima, Thatcher, Safford, Benson, Kennard, Elgin and Fairbanks. At the latter station the train will be turned over to the El Paso and Southwestern railroad by the Southern Pacific. The train will proceed to Naco, Bisbee, Douglas, Kelton, Midway, Pearce, Safford and back to Cochise.

The train will be loaded with all kinds of agricultural exhibits and displays. Some stock will be taken along also. The lectures will be delivered by men from the agricultural college and the university experiment station. These lectures are on different agricultural topics. This is a part of the university extension course, and according to all reports a good service is being rendered the farmers of the state through the work.

Wiping Out Grease Stains.

For grease stains on' fast colors, benzine can be used. For dry paint stains, rub with equal parts of turpentine and alcohol.

Good Filler.

There's a country editor not a thousand miles from here who, when he gets shy on copy, runs in a couple of columns of "Lucile."

Praise This Remedy For Lung Trouble

If the voluntarily written words of grateful people, living in all parts of the country, praising Eckman's Alternative, a remedy for the treatment of coughs, colds, throat and lung troubles, are to be believed, this medicine is certainly doing a vast amount of good for such sufferers. We state none but facts and give to you the names and words of praise of those who declare it benefited them—in many cases coupled with the writers' statements that it restored them to health. This is a sample taken from many:

St. Mary's Academy, O'Neill, Nebraska
"Gentlemen: About seven years ago, I was attacked with the dreaded disease, Tuberculosis. I coughed incessantly, could not sleep nor eat, even could not speak out loud and could do not work. I had three hemorrhages, raised blood most of the time and suffered with night sweats, fever and chills. A specialist of Columbus, Ohio, pronounced my case hopeless.

Nearly five years ago, I heard of your Alternative and procured some at once, with the result that I soon found myself restored to health. For the past four years I have been able to continue my teaching and though I have always had heavy school work, I am also able to perform much manual labor. I consider your medicine, if faithfully taken, a most excellent remedy for consumption. Mother Superior permits this testimonial."

(Signed) SISTER MARIE, Sisters of St. Francis.

Eckman's Alternative is effective in Bronchitis, Asthma, Hay Fever, Throat and Lung Troubles and in upbuilding the system. Does not contain poisons, opiates or habit-forming drugs. For sale by Lowell Drug Co., Li Lowell and other leading druggists. Ask for booklet telling of recoveries and write to Eckman Laboratory, Philadelphia, Pa., for additional evidence.—Advertisement. 259

Grateful for Sentence.

"Thank yer. May the Lord bless yer. May yer head never ache!" said a woman sentenced to ten months' hard labor to the judge.

When you ask for beer do not take a substitute. Insist on having The Tannhauser Beer, (the beer that is bottled at the Brewery.) Delivered to you at \$3.50 per case. If your grocer does not have it, call

About Bisbee Gas Service

Two points of great importance to the user or prospective user of gas are—
1st -- Dependable Service.
2nd -- Quality of Gas

(Heat Value -- Contents in British Thermal Units)

With reference to the first we can say that when we took over the local gas business, July 1st, 1911, we immediately began making repairs and improvements to the plant and distributing system necessary to put the gas supply on a reliable basis, with the result that the gas has not been off the town since August 3rd, 1911, and the public may rely upon every effort being put forth to continue this record indefinitely.

As to the quality of the gas we have been making, our records show that we have been furnishing gas of Standard quality for more than a year, and in order to check our figures we recently sent a sample to an expert gas engineer for analysis. He states: "This shows a splendid grade of oil gas,"— the complete analysis is as follows:

SAMPLE OF GAS SUBMITTED BY BISBEE IMPROVEMENT COMPANY SHOWS FOLLOWING CONTENTS:

CO ₂	Carbon Dioxide	.9
CxHy	Illuminants	3.1
O	Oxygen	.4
CO	Carbon Monoxide	3.5
H	Hydrogen	52.9
CH ₄	Methane	38.2
N	Nitrogen	1.0

Percent	100.0
British Thermal Units	- 666
Candle Power	- 20.6

THE GAS METER

For the benefit of anyone interested in the working of the gas meter, we have connected, in our display room, a gas meter having glass top and sides, exposing to view all the working parts. This meter can be seen in operation and we feel sure it will be of interest to many gas users. Call and ask for a demonstration and watch the meter do its work. It will show you how much faster the meter runs when valve is opened so far that the gas flame extends up around vessel, and what a saving can be effected by proper use of the little simmer burner. Come and see — laid open to plain view — that apparently mysterious piece of apparatus that has been registering the gas you use.
